

# SmartBrowser Update

for iOS / Version 1.3.3 build52

2017年12月

株式会社 ブルーテック  
Bluetech Corporation

## 更新内容-概要

iOS Version 1.3.3 build52 の更新内容について

1. QR読み込み時に読み取り内容をフィルタする機能の追加
2. OCR機能の追加 【新機能】
3. ブラウザのキャッシュを消去する機能の追加 【新機能】
4. AirPrint機能の追加 【新機能】
5. 設定QR読み取り機能 【機能追加】
6. Bluetooth SPP シリアル通信機能の追加(EPSON/SATOモバイルプリンタ対応) 【新機能】

# QR読み込み時に読み取り内容をフィルタする機能

## 1. QR読み込み時に読み取り内容をフィルタする機能

inputタグの要素に「**scanpattern**」を追加し、値に「**正規表現で読み取りパターン**」を設定します

デモサイト：

[http://www.bluetech.co.jp/iweb/smartbrowser/sample/qr\\_scanpattern.html](http://www.bluetech.co.jp/iweb/smartbrowser/sample/qr_scanpattern.html)

ASD123

```
<input type="text" scanpattern="[A-Z][A-Z][A-Z][0-9][0-9][0-9]" />
```

123ASD

```
<input type="text" scanpattern="[0-9][0-9][0-9][A-Z][A-Z][A-Z]" />
```

# OCR機能の追加

## 2. OCR機能(1)

smartbrowser().callAPIで「path:'ocr/recognize'」を呼び出しOCR機能を起動します

**デモサイト** : <http://www.bluetech.co.jp/iweb/smartbrowser/sample/ocr.html>

path	params	value	example
ocr/recognize	width_ratio	読み取り枠サイズの幅を指定 (画面幅に対して)	'width_ratio':0.5
	aspect_ratio	読み取り枠サイズの高さを指定 (width_ratioに対して)	'aspect_ratio':0.25
	enable_binarize	画像を二値化して読み取るか (true/false)	'enable_binarize': true
	char_whitelist	読み取り可能な文字を指定します	'char_whitelist':'0123456789.-:/'
	regex	読み取りパターンを正規表現で指定します	'regex':'[0-9][0-9][./][0-9]?[0-9][./][0-9]?[0-9]'
	traineddata_url	tesseract OCRのtraineddataがある場合は URLを記述することで取り込むことができます  無指定の場合は「Eng.traineddata」となります	'traineddata_url':'http://www.bluetech.co.jp/iweb/smartbrowser/test/7barsp.traineddata'
	engine_mode	OCR エンジンモード(default:tesseractOnly)	'engine_mode':' tesseractOnly'
value		notes	
tesseractOnly		Run Tesseract only - fastest	
cubeOnly		Run Cube only - better accuracy, but slower	
tesseractCubeCombined		Run both and combine results - best accuracy	

# OCR機能の追加

## 2. OCR機能(2)

path	params	value	example
ocr/recognize	formats	<p>読み取りパターンを簡易表記で設定します</p> <ul style="list-style-type: none"> <li>「英」 : アルファベット</li> <li>「数」 : 数値</li> <li>上記以外 : 固定文字</li> </ul> <p>複数のパターンがある場合はカンマ区切りで記述します</p>	<pre>'formats': [     '英英数数数数英数数数',     '英英数数数数英英',     '英英数数数数数数',     'SR-英英英数数数',     'SR-英英数数数', ],</pre>
	format_corrections	<p>読み取った値を置換するパターンを設定します</p> <p>formatsで指定した「英」「数」に対して、読み取り時の置換パターンを記述します。</p> <p><b>'置換対象文字':'置換後文字'</b></p> <p>「英」指定の場合に「0(ゼロ)」と読み取った場合は「O(オー)」に置換するなどの処理を内部的に行います。</p> <p>複数のパターンがある場合はカンマ区切りで記述します</p>	<pre>'format_corrections': {     '英': {         '0': 'O',         '1': 'I',         '2': 'Z',         '5': 'S',         '8': 'B',     },     '数': {         '0': '0',         '1': '1',         '2': '2',         '5': '5',         '8': '8',     } }</pre>

# OCR機能の追加

## 2. OCR機能(3)

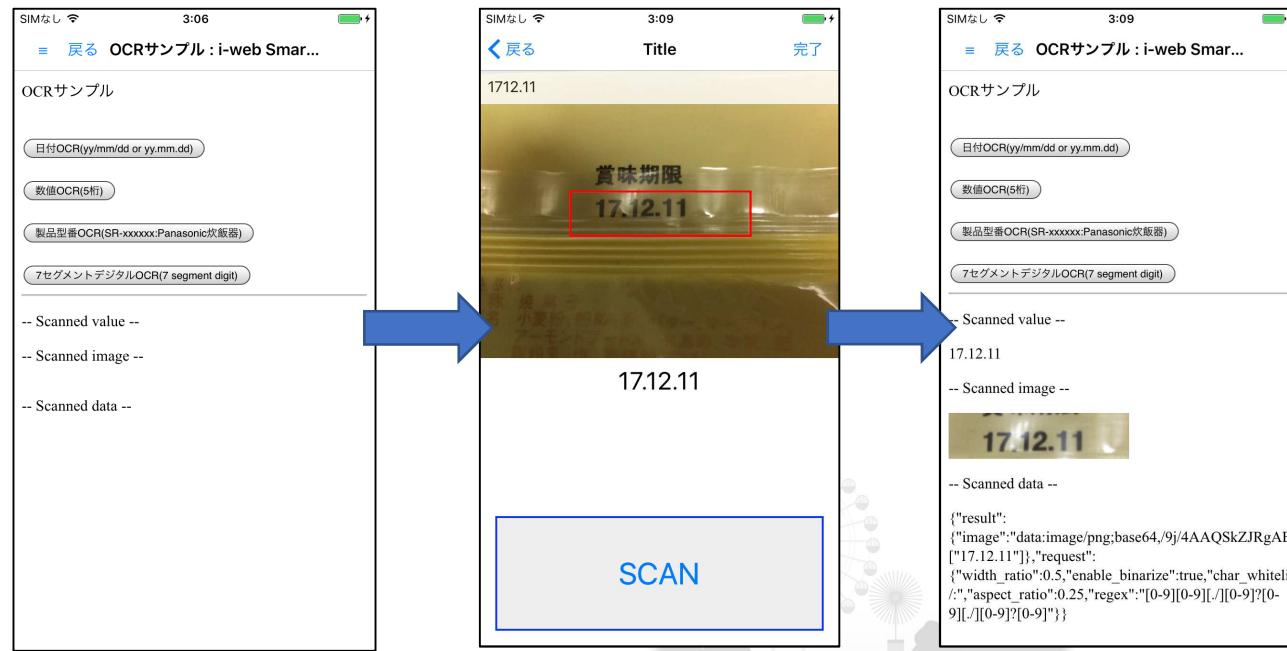

path	params	value	example																										
ocr/recognize	page_segmentation_mode	<p>Page segmentation modesを指定します</p> <p>Page segmentation modes:</p> <p>※default value:singleLine</p> <table border="1"> <thead> <tr> <th>value</th><th>notes</th></tr> </thead> <tbody> <tr> <td>autoOSD</td><td>Automatic page segmentation with orientation and script detection. (OSD)</td></tr> <tr> <td>autoOnly</td><td>Automatic page segmentation, but no OSD, or OCR.</td></tr> <tr> <td>Auto</td><td>Fully automatic page segmentation, but no OSD.</td></tr> <tr> <td>singleColumn</td><td>Assume a single column of text of variable sizes.</td></tr> <tr> <td>singleBlockVertText</td><td>Assume a single uniform block of vertically aligned text.</td></tr> <tr> <td>singleBlock</td><td>Assume a single uniform block of text. (Default.)</td></tr> <tr> <td>singleLine</td><td>Treat the image as a single text line.</td></tr> <tr> <td>singleWord</td><td>Treat the image as a single word.</td></tr> <tr> <td>circleWord</td><td>Treat the image as a single word in a circle.</td></tr> <tr> <td>singleChar</td><td>Treat the image as a single character.</td></tr> <tr> <td>sparseText</td><td>Find as much text as possible in no particular order.</td></tr> <tr> <td>sparseTextOSD</td><td>Sparse text with orientation and script det.</td></tr> </tbody> </table>	value	notes	autoOSD	Automatic page segmentation with orientation and script detection. (OSD)	autoOnly	Automatic page segmentation, but no OSD, or OCR.	Auto	Fully automatic page segmentation, but no OSD.	singleColumn	Assume a single column of text of variable sizes.	singleBlockVertText	Assume a single uniform block of vertically aligned text.	singleBlock	Assume a single uniform block of text. (Default.)	singleLine	Treat the image as a single text line.	singleWord	Treat the image as a single word.	circleWord	Treat the image as a single word in a circle.	singleChar	Treat the image as a single character.	sparseText	Find as much text as possible in no particular order.	sparseTextOSD	Sparse text with orientation and script det.	'page_segmentation_mode':'singleLine'
value	notes																												
autoOSD	Automatic page segmentation with orientation and script detection. (OSD)																												
autoOnly	Automatic page segmentation, but no OSD, or OCR.																												
Auto	Fully automatic page segmentation, but no OSD.																												
singleColumn	Assume a single column of text of variable sizes.																												
singleBlockVertText	Assume a single uniform block of vertically aligned text.																												
singleBlock	Assume a single uniform block of text. (Default.)																												
singleLine	Treat the image as a single text line.																												
singleWord	Treat the image as a single word.																												
circleWord	Treat the image as a single word in a circle.																												
singleChar	Treat the image as a single character.																												
sparseText	Find as much text as possible in no particular order.																												
sparseTextOSD	Sparse text with orientation and script det.																												

# OCR機能の追加

## 2. OCR機能(4)

例：賞味期限の日付を読み取ります。

デモサイト：<http://www.bluetech.co.jp/iweb/smartbrowser/sample/ocr.html>

The figure consists of three screenshots of a mobile application interface for Optical Character Recognition (OCR).  
 1. The first screenshot shows the application's main menu with several OCR options: 日付OCR(yy/mm/dd or yy.mm.dd), 数値OCR(5桁), 製品型番OCR(SR-xxxxxx:Panasonic炊飯器), and 7セグメントデジタルOCR(7 segment digit). It also displays the text "OCRサンプル" and the status "SIMなし".  
 2. The second screenshot shows a preview of the scanned image. The text "賞味期限" (Expiry Date) is visible at the top, and the date "17.12.11" is highlighted with a red box. Below the image, the text "17.12.11" is displayed again, followed by a large blue button labeled "SCAN".  
 3. The third screenshot shows the results of the OCR process. It displays the scanned value "17.12.11", the scanned image, and the scanned data. It also includes a JSON API response under the heading "-- Scanned data --":

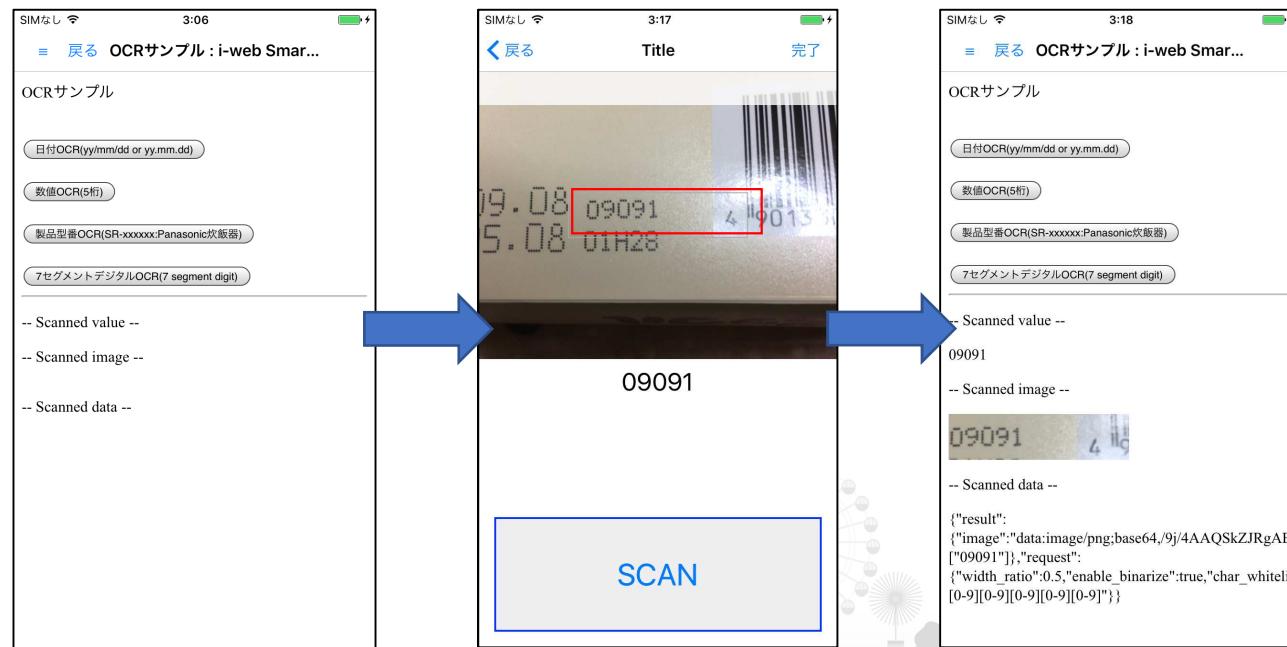

```
{"result": {"image": "data:image/png;base64,/9j/4AAQSkZJRgABAQABAJ..."}, "request": {""width_ratio": 0.5, "enable_binarize": true, "char_whitelist": "/", "aspect_ratio": 0.25, "regex": "[0-9][0-9]/[0-9][0-9]"}}
```

## OCR機能の追加

## 2. OCR機能(5)

例：製造番号 数値（5桁）を読み取ります。

デモサイト : <http://www.bluetech.co.jp/iweb/smartbrowser/sample/ocr.html>

## OCR機能の追加

## 2. OCR機能(6)

例：製品番号を読み取ります。(サンプルはPanasonic社の炊飯器カタログ)

**デモサイト** : <http://www.bluetech.co.jp/iweb/smartbrowser/sample/ocr.html>

読取対象製造番号 [http://panasonic.jp/catalog/ctlg/rice\\_cooker/book.html](http://panasonic.jp/catalog/ctlg/rice_cooker/book.html)

# OCR機能の追加

## 2. OCR機能(7)

例：7セグメントデジタル表示(7 segment digit)のtraineddataを指定して、

数値4桁分読み取ります。

**デモサイト** : <http://www.bluetech.co.jp/iweb/smartbrowser/sample/ocr.html>

The figure consists of three screenshots of a mobile browser application demonstrating the addition of an OCR feature:

- Screenshot 1:** Shows the application's main interface with several OCR options: "日付OCR(yy/mm/dd or yy.mm.dd)", "数値OCR(5桁)", "製品型番OCR(SR-xxxxx:Panasonic炊飯器)", and "7セグメントデジタルOCR(7 segment digit)". Below the interface, there are sections for "Scanned value", "Scanned image", and "Scanned data".
- Screenshot 2:** Shows a camera viewfinder with a QR code at the top. In the center, the number "3456" is displayed with a red box around it, indicating the area being scanned. A large blue arrow points from the first screenshot to this one.
- Screenshot 3:** Shows the results of the scan. It displays the extracted digits "3456" and the raw scanned data "3456". Below this, a JSON object represents the "result" of the OCR operation, detailing the image data, request parameters, and trained data URL.

# 設定QR読み取り機能

## 5. 設定をQRから読み込み更新する機能

**【追加機能】** ブックマークを取り込む際に、ブックマークを追加するか、書き換えるかを選択可能としました。

既存のブックマークを残しつつブックマークを取り込むことができます。

メニュー → 設定 → 設定画面の右上QRボタンでカメラ起動 → 設定QRを読み込 → 確認 → インポート指定

### ※インポート指定

- ・「現在のブックマークに追加」を選択  
既存のブックマークにサイトを追加します。  
既に存在する場合は、URLが同一ものはTitleを上書きします。
- ・「現在のブックマークを置き換える」を選択  
既存のブックマークをクリアしてサイトを追加します。

# 設定QR読み取り機能

## 5. 設定をQRから読み込み更新する機能

設定書式 - 設定はJsonで記述します

```
{
    "default_page_url": string型,           //デフォルトページ
    "use_front_camera": bool型,             //フロントカメラを使用する
    "gps_enable": bool型,                  //GPSを使用する
    "vibrate_when_scanned": bool型,        //スキャン時にバイブレート
    "ring_when_scanned": bool型,           //スキャン時に効果音を鳴らす
    "device_name": string型,               //端末名
    "bookmark": [
        {
            "title": string型,              //タイトル
            "url": string型,              //URL
        },
        {
            "title": string型,
            "url": string型,
        },
        ...
    ],
}
```

### ※仕様についての注意事項

- ・設定した項目のみ上書きします
- ・変更しない項目については、項目名を含めないようにしてください
- ・ブックマークについては、登録済みの内容をいったん削除した後に設定値を登録します
- ・bool型は “true” / “false” で記述してください(ダブルクオートで囲います)

# 設定QR読み取り機能
